FRESCO IS MANUFACTURING FOOT CARE PRODUCTS SINCE 1975

- ✓ 5.500 m² of facilities
- ✓ 3.000 Spanish medical professionals purchasing products directly
- ✓ Sales to more than 75 countries covering all continents
- ✓ **PRODUCTS MANUFACTURED IN SPAIN: European service and quality**

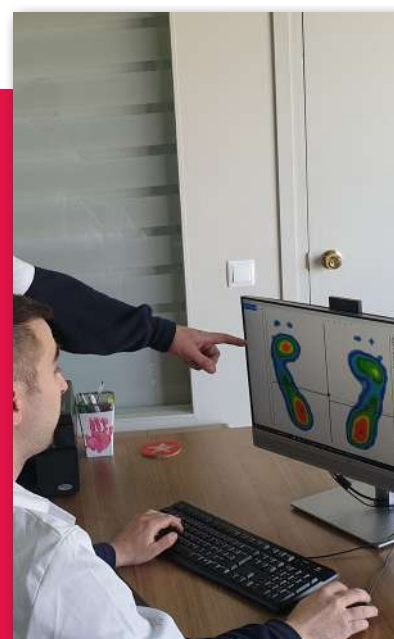

RENEWABLE RESOURCES: Since July 2022 plant powered by solar panels.
Up to 75% of energy consumption coming from renewable resources.

RESEARCH & DEVELOPMENT

SINCE 1975 FRESCO IS WORKING CLOSELY WITH SPECIALISTS TO DEVELOP AND MANUFACTURE USEFUL PRODUCTS THAT COVER DAILY NEEDS OF PROFESSIONAL PRACTITIONERS AND PATIENTS.

ONGOING IMPROVEMENT

We invest every year on equipment and human resources, experiencing with new raw materials, designing new products and improving current ones.

To reach superior products performance at reasonable prices our team works closely with our costumers strengthening our links.

QUALITY

Our quality management system, audited according to ISO 13485, ISO 9001 and ISO 22716 norms, supports research and development tasks as well as all the other processes of the company.

TEST LAB

With the aim of giving best response to market requirements we provide tests results with our testing equipment, including among others compression, elongation tests and pressure mapping analysis.

QUALITY & CERTIFICATIONS

FRESCO holds the Medical Manufacturer License and Third-Party Manufacturing License No. 7521-PS, issued by the Spanish Agency of Medicines and Medical Devices (AEMPS).

In addition, FRESCO is certified under the latest quality management standards, including **ISO 9001:2015**, the specific standard for medical devices **ISO 13485:2016** and **ISO 22716:2007** for Good Manufacturing Practices (GMP) in the cosmetics industry.

FRESCO is regularly audited by certification bodies and by our OEM customers, including major international retailers.

At FRESCO, we are committed to maintaining the highest standards of quality and safety in every product we manufacture.

We operate under a culture of continuous improvement, ensuring full compliance with current European regulations and proactively adapting to future requirements.

Our quality management system is designed to meet our partners' expectations and reinforce long-term trust and reliability.

CONTACT US

OUR FACTORY

Fresco products are used in more than **75 countries worldwide**. Our modern manufacturing facility in Parets del Vallés (Barcelona), opened in 2014, reflects our commitment to quality and innovation. In 2022, we expanded it, adding an extra 50% of square meters and boosting both our production and storage capacity to meet the growing global demand for Fresco products. In 2024, we opened our new and refurbished headquarters, home to our national and export sales, marketing, IT, and accounting teams. It remains **in the heart of Barcelona** (Spain), where creativity and excellence drive everything we do.

OEM

Fresco has long track record manufacturing on private label basis for top retail distributors in Europe and abroad.

Our team and facilities are ready to accompany our customers from the early stages, beginning in product and marketing definition and ending on the delivery of ready to market products.

Our flexibility to adapt to the needs of each case give options to our customers to choose among different product presentations, such as different packaging types.

All processes included in private label projects are executed under the standards of Fresco's quality management system.

SOURCING AND SPECIAL REQUIREMENTS

If you can't find a suitable stock product in this catalogue, please contact us. We are manufacturers, and we may be able to help you.

Special orders may be subject to large quantities.

CLINIC CATALOGUE

The Clinic range has been developed to support healthcare professionals in protecting and treating sensitive skin and pressure-risk areas.

This catalogue includes our specialized solutions for clinical care, such as offloading felts for diabetic foot, silicone sheets for scar treatment, gel pads for pressure relief, and protectors to help prevent skin tears.

Each product is designed to provide comfort, durability, and effective support in demanding medical environments — always ensuring patient well-being and professional confidence.

Ask for our Clinic Catalogue to discover our complete range of products and solutions for clinical care.

OUR TECHNOLOGIES

At Fresco, we combine experience and innovation to develop advanced materials and components for medical and orthopedic applications.

Our main technologies include **Polymer Gel** and **Silicone**, both made with certified biocompatible materials suitable for Class I medical devices.

We also offer **silicone lamination**, **adhesive coating on different supports such as felts, moleskins, and foams**, as well as **material die-cutting, plastic injection**, and the production of **customized insoles**.

These capabilities allow us to provide complete in-house manufacturing solutions tailored to each project's specific requirements.

All our technologies are developed under strict quality and safety standards, ensuring reliability and consistent results for healthcare professionals and patients alike.

FRESCO - INNOVATION AND COMFORT FOR PROFESSIONAL HEALTHCARE.

FRESCO'S 50TH ANNIVERSARY

In 2025, Fresco celebrates 50 years of history since its founder, Don Alberto Fresco, turned his instinct and determination into a pioneering company in the world of professional podiatry. What began in a small apartment in Barcelona has grown—through hard work and without shortcuts—into an international brand present in more than 70 countries, recognized for its innovation and commitment to professionals.

From the iconic Bland-Rosé silicone to specialized hospital lines, every advancement has been born from active listening and a genuine passion for providing real solutions. Today, the second generation continues this legacy with the same philosophy: to keep growing without ever losing the soul and values that gave life to Fresco, while expressing deep gratitude to the professionals who care for the feet of the world and make this story possible.

“EVERYONE HAS TWO FEET AND FIVE TOES ON EACH FOOT... HOW MANY MILLIONS OF PEOPLE ARE THERE IN THE WORLD? WELL, IMAGINE HOW MANY PROBLEMS THERE ARE TO SOLVE.”

- ALBERTO FRESCO

From left to right: Naiara, Alberto, Marga, Aitor and Unai celebrating Fresco's 50th anniversary.

GEL TOE SPREADER & BUNION PROTECTOR

Bunion protector with built-in spacer. Relieves and dampens pressure and friction in the bunion area, while helping correct positioning of the big toe. Made of an elastic and soft, moisturizing gel, it aids the disappearance of corns and abrasions. One size fits all.

F-00042-54 ONE SIZE

AVAILABLE PACKS

HALLUX VALGUS NIGHT SPLINT

Plastic sling holds the foot in the correct position during the night. Soothes pain by pulling the joint outwards. Realigns the big toe and prevents possible worsening. Traction must be carried out so that correction of the toe deformity is visible. Placement is most effective when the articulation at the base of the big toe experiences a slight pain when pushed. The night splint follows the principle of preventive bindings (prolonged, low-intensity action) through which progressive improvement is achieved until the soft parts and articulations are normalized without damage. The articulation should not be forced in such a way that pain prevents one from resting properly. The curve of the splint matches the curve of the instep of the foot (as with footwear).

CORRECTIVE HEEL CUP

Manufactured with two densities of silicone.

Posture corrective heel cups. Relieves discomfort caused by pronation (the foot rolling inward) or supination (the foot rolling outward), by restoring balance and relieving pain in the feet, ankles, knees, hips and back.

AVAILABLE PACKS

GEL HEEL CUP

Ideal for people who suffer from heel spur, tired feet or who spend several hours a day standing. Provide extra comfort and foot relief, as well as knee, hip and back pain. Made with two types of gel; soft and firm. The blue coloured part is extra soft, providing a cushioned zone. The wavy base has double action, it is anti-slip, in addition to helping to reduce pressure and absorb impacts. Its thin and light design adapts to all types of footwear and foot shape. Its walls surround the foot and help to fixate in the shoe without moving inside it.

WALKING AIDS

WALKING STICK HANDLE PROTECTOR

A protector to prevent calluses and hard areas forming on the skin of the hands of people who walk using a walking stick. The diamond-shaped cross-section of the tube, combined with its tacky but not sticky feel, improves the hand's grip, enhancing safety and preventing falls when using a walking stick. On the other hand, its elasticity makes it possible to adapt it to different shapes and sizes of walking stick. The tube is washable and reusable.

F-00018-01 Walking sticks 1 tube

AVAILABLE
PACKS

CRUTCH HANDLE AND ELBOW PROTECTORS

A set of protectors to prevent calluses and hard areas forming on the skin of the hands of people who walk using crutches. Comprises four tubes of gel, two of them to protect the palm of the hands, and other two tubes with a central opening to protect the forearm area that rests on the crutch. The diamond-shaped cross-section of the tube, combined with its tacky but not sticky feel, improves the hand's grip, enhancing safety and preventing falls when the crutches are used. On the other hand, its elasticity makes it possible to adapt it to different shapes and sizes of crutch handles and forearm areas. The tubes are washable and reusable.

MIXABLE SILICONES

Fresco silicones have been used by podiatrists worldwide since 1985. Easy to handle and highly versatile, they allow the professional to produce the palliative, corrective or replacement orthosis required for each case.

Fresco's training department also offers an educational video on Fresco silicones, presented by **Mr Alberto Fresco**, who has more than 40 years of experience working with silicones and delivering training courses to podiatrists around the world.

YouTube

Also available at:
<https://www.youtube.com/6gJaE>

SILICONE COURSES

AT FRESCO, WE STRONGLY SUPPORT TRAINING AND EDUCATION, HELPING PROFESSIONALS CREATE CUSTOMISED SOLUTIONS FOR EACH PATIENT, TAILORED TO THEIR SPECIFIC NEEDS USING MIXABLE SILICONES.

Unfortunately, mixable silicone techniques are often not taught properly in schools, which can leave professionals feeling unsure when using them. For this reason, at Fresco we help our customers understand the different types of silicone, their various applications, and the techniques available to foot care specialists. We offer two types of training:

In your country: These courses are usually aimed at professionals and ideally organised in groups of 15–20 participants, with 2 or 3 groups over 2–3 days (one day per group). A duration of 4–5 hours is generally enough to provide a solid overview of the main silicone techniques. The training can also be adapted for sales teams or for students and teachers at universities or training schools.

In Barcelona: you can also send members of your team to our offices in Barcelona, where they can receive training to later deliver courses themselves to other professionals in your country.

SILICONE CHARACTERISTICS

- These silicones are designed to help create customized orthotic and protective solutions, offering excellent handling, good skin tolerance and a pleasant feel for the patient. Their versatility makes them **suitable for different podiatric needs**, from pressure relief and friction protection to correction and support, allowing professionals to **work with precision and confidence** in daily clinical practice.
- It cures with either **liquid or paste catalyst** and can be mixed with other Fresco polycondensation silicones to achieve different hardness levels.
- Its **high elasticity and low stiffness** make it especially suitable for **geriatric and diabetic feet**. The finished orthosis is washable and reusable.

FRESCO SILICONE RANGE (WITH CATALYST)

Fresco polycondensation silicones are designed for the fabrication of palliative and corrective orthoses. Used with a liquid or paste catalyst, they offer excellent workability and adaptability to different clinical needs.

The range is organised into three levels — Soft, Medium and Hard — to cover everything from maximum cushioning and pressure relief to more structured and corrective applications. Softer silicones are ideal for sensitive, elderly or diabetic patients, while higher hardness options are designed for more resistant, corrective and positioning orthoses.

All silicones can be mixed together to achieve intermediate hardness levels, allowing full customisation. Finished orthoses are washable and reusable.

SOFT SILICONES

For cushioning, pressure relief and maximum comfort — ideal for elderly people and diabetic foot care.

SILICONE BLAND-ROSÉ

Ultra-soft silicone for maximum cushioning and pressure relief in palliative orthoses.

Technical characteristics:

- Stretching: 364%

DUO SILICONES

DUO RANGE (A+B SILICONES)

Duo is a 1:1 two-part (A+B) silicone range designed for the fabrication of palliative, corrective and replacement orthoses. Easy to use, both components are simply mixed in equal parts until a uniform colour is obtained, then applied and moulded directly onto the foot.

The range offers different hardness levels to adapt to specific clinical needs. Softer silicones are ideal for elderly patients, diabetic foot care, and for applications where comfort, cushioning, pressure relief and pain reduction are essential. Higher hardness levels are designed for more demanding corrective treatments, including toe alignment, position correction and more rigid protective orthoses.

All silicones within the Duo range can be mixed together to achieve intermediate hardness levels. For example, mixing DUO 10 and DUO 30 at a 50/50 ratio results in an approximate Shore A 20, allowing greater flexibility and customisation.

All finished orthoses are washable and reusable.

DUO 10

Soft silicone for palliative and comfort orthoses.

Technical characteristics:

- Stretching: 550%
- Hardness Shore A: 10-12

F-01924-00 (250g + 250g)

LIQUID SILICONES

RTV - WITH CATALYST

Fresco liquid silicones (RTV) are two-component elastomers designed for bonding, repairing and coating silicone orthoses.

They vulcanise with Fresco catalysts and offer excellent adhesion to different materials such as silicone, Tubiton, gauze or latex foam.

Thanks to their fluid consistency, they are ideal for repair work, reinforcement and finishing applications. Once cured, they provide flexible to semi-rigid results depending on the formulation.

They can also be combined with other silicones in the range to modify elasticity and performance.

RTV SILICONE (STANDARD)

Liquid silicone for bonding, coating and general repair applications.

Technical characteristics:

- Stretching: 250%
- Hardness Shore A: 20

F-01906-01 250g

SILICONE RTV-11504

Highly elastic liquid silicone for flexible bonding and high-resistance repairs.

Technical characteristics:

- Stretching: 320%
- Hardness Shore A: 10

F-01907-01 300g

STARTING KITS

STARTING KITS

Our starting kits have been developed to support professionals in learning how to work with silicones and gaining hands-on experience in orthosis fabrication.

They provide a practical and accessible introduction to handling, mixing and application techniques, using high-quality materials from the Fresco range.

Each kit is designed to help build confidence and skills, whether working with bi-component (A+B) systems or with mixable silicones using a catalyst.

DUO 10 STARTING KIT (A+B SILICONES)

Ideal for getting started with bi-component (A+B) DUO silicones, allowing professionals to practice mixing and application techniques.

F-01924-02 (100g + 100g)

STARTING KIT BOX (MIXABLE SILICONES WITH CATALYST)

Includes two silicone types (soft and medium) and a liquid catalyst to begin practicing orthosis fabrication.

Watch our mixable silicones tutorial on YouTube for step-by-step guidance. Kit content:

- 100 g of silicone Bland-Rosé (Soft Shore A 2-4)
- 100 g of silicone Fresco (Medium Shore A 14-16)
- 20 ml liquid catalyst Reaktol

F-01926-00 1 kit

SILICONE MATERIAL

REAKTOL

A Liquid catalyst used for the mixing of all types of the Fresco silicone range. Has a shelf life of 3 years.

Technical characteristics:

- Colour: Transparent
- Chemical characteristics: Alkyl stannosiloxane (preparation). Free of organic tin compounds. Tetraethylsilicate / Tetrakis (2-n-butoxy-ietoxisilane)

F-01908-00

PASTE CATALYST RED

Paste catalyst used for the mixing of all types of the Fresco silicone range. Its red colour gives a soft red colour to the final orthosis. It is a little bit slower and gives a softer result orthosis than the liquid catalyst. Has a shelf life of 2 years.

F-01910-00

SILICONE OIL

200 ml silicone oil which can be used to obtain a brighter, more consistent and softer to the touch finishing work to any orthosis made with our silicones. It can also be mixed with other paste and liquid silicones to make the mass more fluid. If you need to make an orthosis with any kind of support (fabric or any other porous material) if the oil is used in the mass this will help the silicone penetrate and stick much better on the support. It is recommended to test the support beforehand, silicones do not adhere easily to plastic or other nonporous materials.

F-01920-00

SILICONE ACCESORIES

STAINLESS STEEL SPATULA

Spatula inox for liquid silicone's works.

F-01903-00

Circular shape
Blade length: 10 cm

PODISENSE GO

PODISENSE GO

The **ultralight** platform
100% made in Spain

Podisense GO is the latest generation of mobile pressure platforms.

It features the latest innovations in patented pressure sensor technology, as well as new software features, to perform much more comprehensive analyses with greater ease of execution. With Software Suite included, it is the **only option with Cloud Solution on the market**.

With 2D and 3D views.

F-01567-01 48 x 48 cm 1 platform

Official worldwide distributors

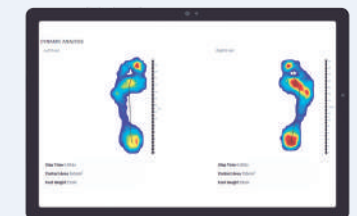

STATIC ANALYSIS

Pressure distribution, footprint type, and center of gravity with 3D visualization.

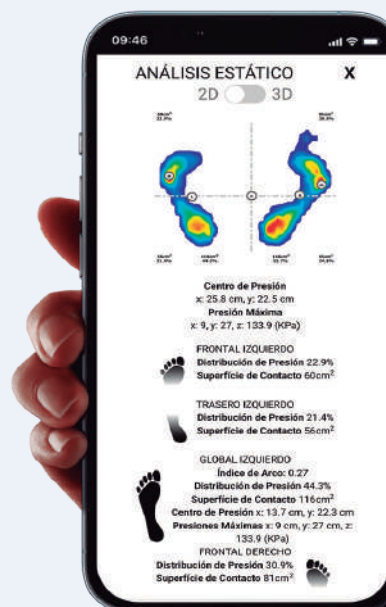

BALANCE ANALYSIS

Monitoring of balance on different planes with detailed graphs.

DYNAMIC ANALYSIS

Analysis of gait progression, maximum pressures, and rockers in time and space.

100% Portable

Compatible with Android, iOS, Windows, and Mac; connect from any device (PC, tablet, mobile).

OTHER PRODUCTS

TUBULAR STOCKINETTE

Used for holding dressing in place. Elastic tubular bandage made of cotton 100%. A method for rapid and convenient dressing retention. Available in 3 sizes. 20 m sheet per box.

F-00800-01	S - 12 mm diameter	Toes
F-00800-02	M - 20 mm diameter	Fingers and toes
F-00800-03	L - 28 mm diameter	Bulky finger dressings

TUBULAR BANDAGE APPLICATOR

Two sizes available.

F-00801-01	S	Small toes
F-00801-02	L	Big toes

FOOT IMPRESSION SHEETS

For study the pressure of the foot sole. Without tints, liquids and other dirty apparatus. Easy and clean. Due to its size can be filed easily. White cartoon at the back to take any patient annotations. Size of each sheet: 35 x 19.5 cm. 100 sheets per pack.

F-01111-02

FOOT IMPRESSION FOAM

Foam to make 3 dimensional impressions of the foot. Ideal for making precise plaster molds. Cytotoxicity and biocompatibility tested to be used in all kind of foot.

F-01120-02	25 units
F-01120-03	50 units

MISCELLANEOUS | OTHER PRODUCTS

EXCLUSIVE DESIGN
PATENTED

FIRST RAY MEASURING DEVICE

This 2-piece instrument consists of an L-shaped piece and an inverted L-shaped piece joined by their vertical arms, which are marked with a millimetric scale. Its validity and reliability have been scientifically proven.

F-00925-00Z

AVAILABLE
PACKS

Patented product n° 201500721 by a team of researchers from the University of Seville led by Dr. Pedro V. Munuera Martínez

FOOT SKELETON

Skeleton of the foot for MIS Minimally Invasive Surgery practicing procedures.

F-01059-01

SET OF PATTERNS

Set of patterns for insole confection. Children, men, women and lady's high heels.

F-01050-01

FEET POSTER

Artist sketch drawing of the foot in 4 positions.

Measures:

- Width: 100 cm
- Height: 35,5 cm

F-01065-00

GONIOMETRIC REGLET

Of transparent plastic can be fold up. It has graduated segments, concentric circles, graduated semicircle, inverted T, central graduated circle and lateral marks.

Measures:

- Length: 360 mm
- Closed: 205 mm

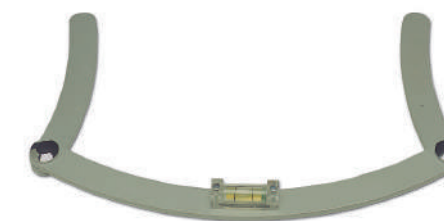

F-00920-00

HIP SPIRIT LEVEL MEASURING DEVICE

Aluminium measurer to know the shortness of the legs.

F-00950-00

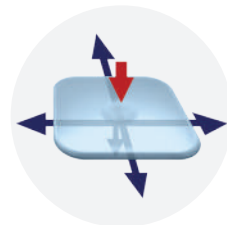

GEL SHEETING MATERIAL

PURE GEL SQUARE

Pure gel square 5 mm thick. Can be cut to any shape and fixed with strapping material to protect areas of the body that require relief from friction and redistribution of pressure. This product can be sandwiched between two layers of material when producing Orthotics.

F-00046-00 10 x 10 cm
